SuperLife UK pension transfer scheme

SuperLife Balanced Fund

This is a replacement fund update dated 3 July 2025, which replaces the previous fund update dated 1 May 2025. The actual investment mix pie chart in the "What does the fund invest in?" section has been updated to show corrected asset allocation data for the period.

Fund update for the quarter ended 31 March 2025

This fund update was first made publicly available on 3 July 2025.

What is the purpose of this update?

This document tells you how the SuperLife Balanced Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Invests in a mix of income and growth assets and is designed for investors that want a balanced investment option. Negative annual returns may occur once in every 5-7 years on average.

Total value of the fund:	$9,048,124
Number of investors in the fund:	67
The date the fund started:	24 July 2012

What are the risks of investing?

Risk indicator for the SuperLife Balanced Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about the risks associated with investing in this fund.

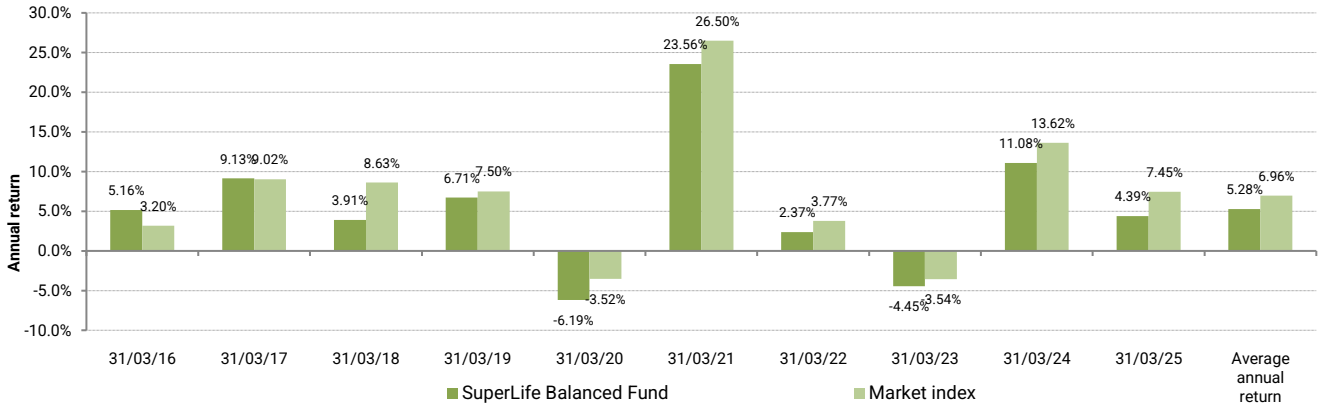
How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	6.98%	4.39%
Annual return (after deductions for charges but before tax)	7.87%	5.40%
Market index annual return (reflects no deduction for charges and tax)	9.10%	7.45%

The market index return is a composite of benchmark index returns, weighted for the fund's target investment mix (also known as target asset allocation). The specific benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

The SIPO and further additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz.

Annual return graph



This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 31 March 2025.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at 28%.

What fees are investors charged?

Investors in the SuperLife Balanced Fund are charged fund charges. In the year to 31 March 2024 these were:

	% per annum of fund's net asset value
Total fund charges	0.81%
Which are made up of:	
Total management and administration charges	0.81%
Including:	
Manager's basic fee	0.79%
Other management and administration charges	0.02% [1]
Other charges	**Dollar amount per investor**
Administration fee	$60 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about those fees.

The fees set out above include GST where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jess had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted but before tax of $540 (that is 5.40% of Jess's initial $10,000). Jess also paid $60 in other charges. This gives Jess a total return after tax of $379 for the year.

What does the fund invest in?[2]

Actual investment mix

This shows the types of assets that the fund invests in.

Further information

You can also obtain this information, the Product Disclosure Statement for the SuperLife UK pension transfer scheme, and some additional information, from the offer register at disclose-register.companiesoffice.govt.nz.

Notes

1 These charges refer to the normal fund operating costs that are charged to the fund. For disclosure purposes, supervisor, audit and legal costs are not included in the manager's basic fee, but are included in the other management and administration charges. Some of these are fixed costs so the amount shown can range from 0% up to the total fund charges depending on the total value of the fund.

2 The 'other' category refers to an investment in infrastructure. The underlying investments are infrastructure securities listed in developed countries.
