

General Market Commentary

The NZ share market struggled in October primarily due to the announcement by Rio Tinto, the owner of the aluminium smelter at Tiwai Point in Southland, to seek a repricing of its electricity contract with Meridian Energy. As the aluminium smelter represents 13% of New Zealand's electricity generation, a closure would have a material impact for New Zealand's electricity companies. Such news weighed heavily on the share prices of Meridian Energy, Genesis Energy, Contact Energy and so forth. The New Zealand commercial property sector also witnessed some investor selling after a period of strong returns for the property sector.

Moving to events worldwide, the US/China trade war remains as the main focus internationally. It appears that the two countries are on track to sign a "phase one" agreement although further posturing from the players involved cannot be ruled out. Many US companies report quarterly earnings in October and at the time of writing over 70% of reported results have beaten market expectations, which added to investor confidence and pushed share prices higher.

For the month of October, the US S&P 500 increased 2.2%, the Australian ASX 200G returned -0.4%, the UK FTSE100 fell -1.9% and the NZX50G -1.3%. Market returns over 1 year remain impressive as the NZ top 50 returned +23.3%, the Australian ASX 200G +19.3% and the FTSE100 returning +6.5%. Official NZ Cash rate is 1.00%

Fund Summary

For the month ending 31 October 2019

NZD Conservative Fund

Description of this Fund

New Zealand dollar (NZD) denominated fund employing a passive management strategy invested 80% in income assets (NZ fixed interest), with a 20% exposure to growth assets (NZ equities). The Investment objective seeks to track a composite index (before annual fund charge and tax), comprising 80% Bloomberg NZBond Govt 0+ Yr Index and 20% S&P/NZX 50 Gross Index (including imputation credits).

Risk indicator for the NZD Conservative Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. For further information on how the risk indicator is calculated, please see the Product Disclosure Statement.
