

## General Market Commentary

Many investors in Garrison Bridge hold GBP investments, patiently waiting for the GBP/NZD exchange rate to improve. Over the month of June, the cross rate rose to a high of \$1.98 to the GBP, fluctuating between \$1.94 and \$1.98. Currency is very difficult to predict and can be very volatile. For investors wishing to switch between the Garrison Bridge investment funds, it is important to keep in mind that there is a five to seven day process to sell the current holding and buy the new fund. This could impact the achieved rate of exchange when switching between investment funds.

International share markets continued to rise with the S&P500 adding 2.09% for the month while the technology focused NASDAQ jumped a whopping 5.67% in June as investors switched from value stocks to growth stocks. Investors took confidence from a US Court decision dismissing an anti-trust complaint against Facebook that could have resulted in the social media selling off parts of its businesses including Instagram and WhatsApp. The judgement benefited other technology mega companies including Apple, Amazon and Alphabet (Google), driving the Nasdaq to record all-time closing highs.

The New Zealand sharemarket added a more modest but still impressive 2.40% for June as both Synlait Milk and A2 Milk bounced back. The dairy companies have been under pressure in previous months with sales results failing to meet expectations as New Zealand's border restrictions continue to limit the important China-NZ sales channel.

While sharemarkets have been bounding ahead, investors are carefully watching for any sign of rising interest rates as any upward movement is likely to put pressure on sharemarket returns. Interestingly, long term bond yields in the US declined by 0.13% as measured by the 10 year Treasury yield, with the NZ 10 year Government bond yield remaining stable. Global yield curves flattened in June suggesting that investors are expecting interest rates to remain relatively stable in the near term.
