## Currency hedging

The following foreign currency exposure targets will apply to international assets:

- International equities – 50% hedged to New Zealand dollars. However, we may aim to add value by tactically adjusting the strategic hedging level on international shares above or below the benchmark of 50% depending on our view of how the New Zealand dollar will perform.

The currency hedging is passive, meaning the investment manager of the underlying funds target the benchmark hedging level, although actual hedging may differ from this, due to cash flow and market movements.

Additional information about currency hedging is available in the 'SIPO' on the 'Scheme Register' at [disclose-register.companiesoffice.govt.nz](https://disclose-register.companiesoffice.govt.nz) (search for 'Garrison Bridge Superannuation Scheme').
